

PackMyRx: Making Camp Medication Management Simple & Safe

When your child heads off to summer camp, you want to focus on the fun memories they'll make—not worry about whether their daily medications are organized and safe. **PackMyRx, powered by Paw Paw Village Pharmacy**, takes the stress out of camp medication management with professionally packaged, clearly labeled medications delivered right to camp.

Why Medication Packaging Matters at Camp

Summer camp is an incredible experience, but managing multiple medications in a busy camp environment can be challenging. Without proper organization, mistakes can happen—missed doses, confusion over timing, or mixing up similar-looking pills.

That's where professional medication packaging makes all the difference. Our system ensures every dose is individually packaged with clear instructions, so camp nurses and staff can confidently administer the right medication at the right time.

Safety First

Each packet is clearly labeled with your child's name, medication details, and timing instructions—eliminating guesswork.

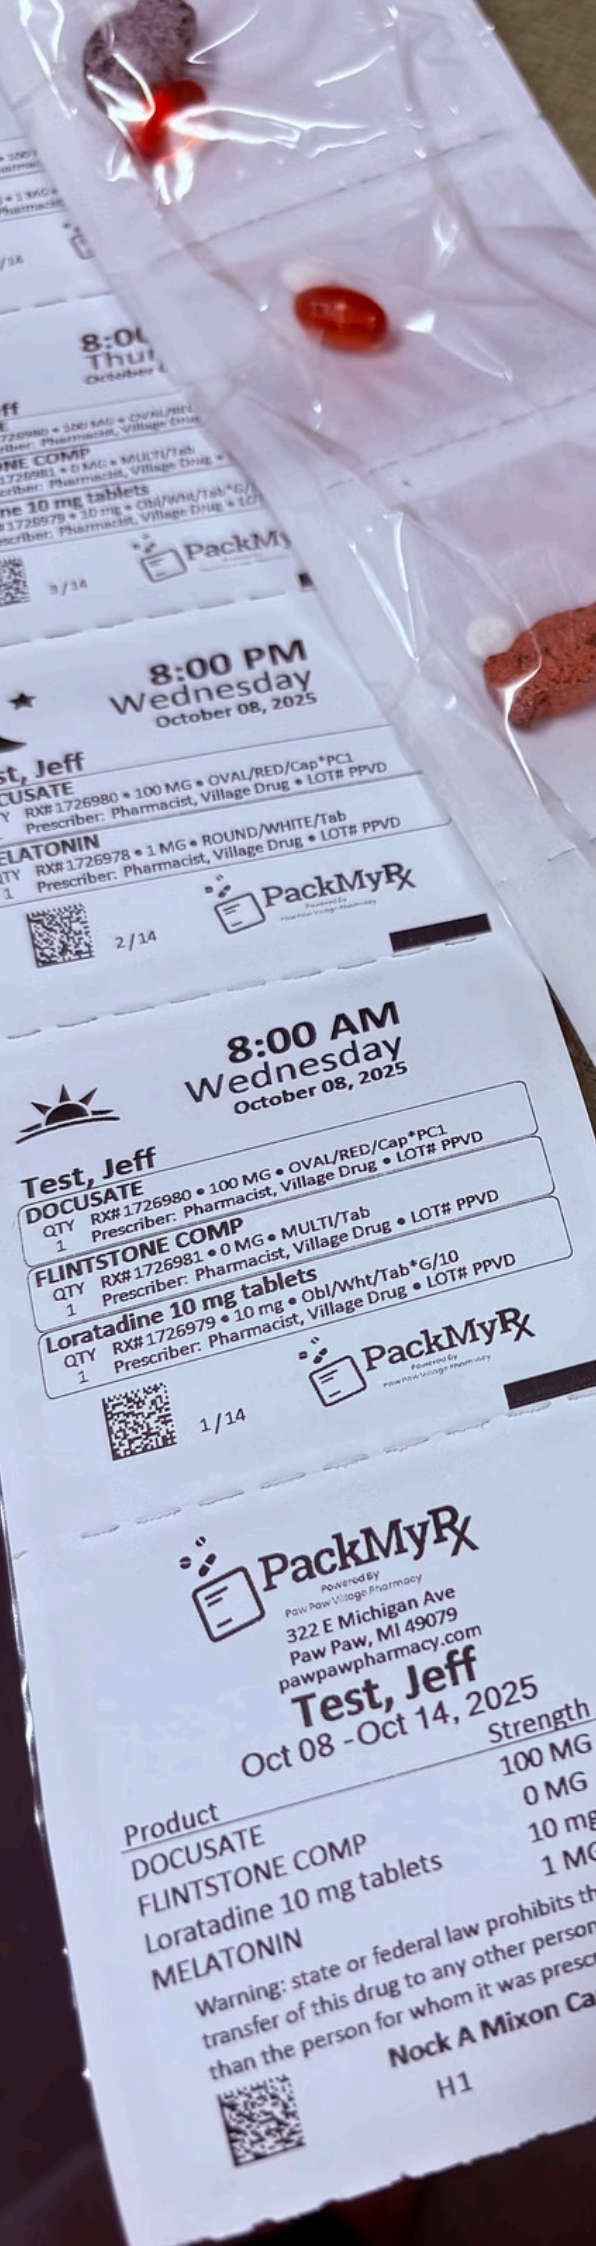

No Missed Doses

Pre-packaged by date and time means camp staff can quickly identify exactly what's needed when.

Peace of Mind

You can relax knowing your child's health routine continues seamlessly while they're away.

What Each Medication Packet Includes

Camper Identification

Full name clearly printed on every single packet for easy identification.

Medication Details

Complete medication name, dosage strength, and quantity included in each packet.

Date & Time

Specific administration date and time printed prominently for scheduling accuracy.

What Parents Need To Do Next

Step 1: Register

Visit our website at www.packmyrx.com to complete the online registration form. Have your prescription insurance information, camp dates and medication list handy.

Registration in PackMyRx will open on January 5th, 2026

Step 2: Submit Prescriptions

Contact your child's doctor and ask them to send prescriptions to Paw Paw Village Pharmacy as soon as possible. **Please be sure to have them include a refill if your child will be at camp for longer than 30 days!**

Paw Paw Village Pharmacy

322 E. Michigan Ave

Paw Paw, MI 49079

Phone: 269-657-6073

NPI: 1689601916

NCPDP: 2332839

DEA: AP1690355

Step 3: Confirm Details

Our team will reach out to verify any details if necessary.

Important Timing: Please complete registration and have your child's prescriptions sent to the pharmacy at least 30 days prior to your child's camp session begins to ensure timely processing and delivery. A late fee will be applied to your account if this deadline is not met.

Frequently Asked Questions

What if my child decides to extend their time at camp?

No problem! Just let us know as early as possible, and we can arrange for additional medication to be packaged and shipped to camp. **We will require a refill prescription from your child's doctor. Please also call them as soon as possible and ask them to send us a refill if they haven't already.**

Do you accept manufacturer coupons?

Yes, we do! Please include the coupon billing information in your registration or email campsupport@pawpawpharmacy.com with the information. We do not accept GoodRx and can only accept coupons directly from the manufacturer of the medication.

What types of medications can you package?

We package prescription medications, over-the-counter medicines, vitamins, and supplements for daily use. Dissolvable medications must remain in original packaging, and gummies have brand limitations and require separate packaging. Please confirm with your child's camp if gummies, liquid, and/or dissolvable medications are permitted.

How and when do I pay my copays?

Once the camp session start date arrives, we will try to bill insurance for the 30-day supply of medication that was sent to camp. You will be notified if there are any issues with billing at that time via email. Please work with us to resolve any issues so that you are not charged the cash price of the medication. Once a paid claim is received from the insurance, you will receive a link to pay the copay via text and email from us. You may use HSA and FSA cards along with Debit and Credit.

I have to refill my child's medication within 2 to 3 weeks of them going to camp. Is that okay?

Yes, this is okay! Ask your pharmacy to short fill the prescription or provide a 30-day supply until camp begins. We will bill your insurance on the camp start date. If insurance doesn't pay within 30 days, you will be responsible for the cash price. Contact your insurance provider for vacation override details if necessary.

What if my child has a medication change?

Contact us at campsupport@pawpawpharmacy.com as soon as possible to make updates to the registration and coordinate with the camp to make changes to the medication packs if they've already been sent.

How do I get the prescriptions to Paw Paw Village Pharmacy?

Have your child's doctor(s) send prescriptions to Paw Paw Village Pharmacy. E-prescribing is the preferred method; controlled substances must be e-prescribed or physically mailed. We do not require prescriptions from the provider for any over the counter medications, vitamins or supplements.

Please be sure to have them include a refill if your child will be at camp for longer than 30 days!

Paw Paw Village Pharmacy

322 E. Michigan Ave
Paw Paw, MI 49079
Phone: 269-657-6073

NPI: 1689601916
NCPDP: 2332839
DEA: AP1690355

How do I know the medications arrived?

We provide tracking information for all shipments in your child's PackMyRx profile and camp health staff typically confirm receipt.

Why Families Trust PackMyRx

For years, families have relied on PackMyRx to simplify medication management during camp sessions. Our partnership with Paw Paw Village Pharmacy combines professional pharmaceutical expertise with a deep understanding of camp life.

We know that sending your child to camp means trusting others with their care. Our meticulous labeling system and direct communication with camp medical staff ensure continuity of care, so your child can focus on making memories—not managing medications.
